ITM 2007

29th NATO/SPS International Technical Meeting
on Air Pollution Modelling and its Application

24 – 28 September 2007
Aveiro, Portugal

Conference location

Aveiro is a dynamic town with 80,000 inhabitants located in the west coast of Portugal. It is known by its "ria" (inland waterways and canals replenished from both the sea and the river), which surrounds and penetrates the town with the distinctive and colourful "moliceiros" boats. It is a town of commerce and services and a growing centre of leisure and culture, with a mixture of neat fishermen's cottages and Art Nouveau historic buildings. The south of Aveiro is the home of the world famous fine porcelain factory "Vista Alegre" founded in 1824.

The University of Aveiro, created 30 years ago, and with more than 11, 000 students, is part of this dynamic and growing town. The extensive stretches of beach just a few kilometres away also make Aveiro very attractive for nature lovers and water sport enthusiasts.
